Art Unit: 2627

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 are, drawn to an optical disk having control information that is updated, classified in class 369, subclass 47.27.
- II. Claims 9-14, drawn to an apparatus having a first and second disk control information recorded therein, classified in class 369, subclass 53.22.

The inventions are distinct, each from the other because of the following reasons:

Inventions group one and group two are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination group has separate utility such as an optical disk which does not require the use of a first and second disk control information. See MPEP § 806.05(d).
